Project Overview

This project was for me to set up a website for my business. This would be done trying to showcase my skills and hopefully get me higher clients giving me more opportunities to show off my work and expand.

Why?

This was done as I wanted to create a website and I knew that my business should probably have one in order for me to get higher up clients so I started by first trying to sketch something out and then after that I went to Google sites and started creating the whole thing.

how

This was done in Google sites by adding photos creating web articles and things like that as well as a Google form for clients and contact info.

conclusion

This was very successful and as of right now I am just finishing up the DNS records which has been not the best but is important and is going pretty well.
